PROFESSIONAL SUMMARY

AWS Certified Solutions Architect and Cloud Engineer.

Experience designing, implementing and supporting secure cloud platforms for Government and Enterprise clients across Defence, Cyber Security and Digital Health Environments.

Skilled in AWS cloud-native services, Infrastructure as Code, platform engineering, Linux administration and DevOps practices. Hands-on experience delivering cloud migration, automation and operational support using Terraform, Kubernetes, Docker and Git-based workflows.

Former Australian Army Reserve Corporal with proven leadership, operational planning and stakeholder engagement skills, bringing a disciplined, adaptable and solutions-focused approach to complex technical environments.

CERTIFICATIONS

AWS Cloud Practitioner | AWS Certifications (2024)
AWS Certified Solutions Architect – Associate | AWS Certifications (2023)
Microsoft Certified: AZ900 – Azure Fundamentals | Microsoft Learn (2023)

TECHNICAL SKILLS

Cloud Technologies	AWS (EC2, RDS, Lambda, CloudFormation, CodeCommit, CloudWatch, ElastiCache, Athena), Microsoft Azure
Infrastructure as Code	Terraform, AWS CloudFormation
Containers & Orchestration	Docker, Compose, EKS
Operating Systems	Linux (RHEL), Windows
Version Control & CI/CD	Git, GitLab, GitHub, AWS CodeCommit
Programming & Scripting	Bash, Python, SQL, JavaScript, HTML, CSS
Databases	Amazon RDS, SQL, Amazon Athena
Monitoring & Operations	Amazon CloudWatch, Incident Management, Production Support, System Monitoring
DevOps & Engineering Practices	Platform Engineering, Infrastructure Automation, Cloud Migration, Software Factory, Technical Documentation, Secure Development, Stakeholder Engagement

RELEVANT EXPERIENCE

Cloud & Engineering Senior Consultant – AWS Platform Engineering | Deloitte

May 2023 – July 2026

Project: Confidential Client

Architected and delivered a secure AWS cloud-native software factory for a large government client, enabling secure, scalable and repeatable application delivery.

- Designed and implemented an AWS software factory using cloud-native services.
- Led migration of an enterprise application from on-premises to AWS.
- Developed Infrastructure as Code using Terraform to provision and manage AWS services including EC2, RDS, Lambda and ElastiCache.
- Administered Linux (RHEL) environments and automated infrastructure deployment.
- Produced Secure Environment Design (SED) and technical documentation while working with stakeholders to achieve security and governance approvals.
- Established Git-based version control practices and engineering standards to support collaborative software development.

Project: Confidential Client

Provided AWS platform engineering support for a large-scale government-led cyber security platform servicing multiple enterprise clients.

- Supported production AWS infrastructure, Kubernetes workloads and Linux systems.
- Onboarded new client environments through technical implementation and stakeholder engagement.
- Worked with EC2, Lambda, CloudWatch, Athena, CloudFormation and SQL.
- Investigated, managed and resolved production incidents to maintain platform availability and performance.

Consultant | WithYouWithMe (WYWM)

May 2021 – May 2023

Project: Production Operations, Level 2 Reporting | Accenture Australia

Supported business-critical production systems for the Australian Digital Health Agency, ensuring the reliable delivery of My Health Record reporting services.

- Investigated production issues across Linux, SQL and VMware environments.
- Delivered operational reporting and technical investigations for government stakeholders.
- Worked within ITIL incident, problem and change processes.

Project: PEGA System Architect | Brumby Systems

Designed and implemented proof-of-concept software solutions for government clients, contributing to Agile software development projects and supporting continuous improvement within the development team.

- Developed proof-of-concept applications for government clients using the Pega Platform.
- Worked within Agile delivery teams and collaborated with technical and business stakeholders.
- Researched new technologies and shared knowledge across the team.

Corporal – Light Cavalry Scout | Australian Army Reserve (NSW & SA)

July 2014 – May 2023

Delivered leadership, communications and operational support within the Australian Army Reserve, leading small teams in high-pressure environments requiring teamwork, discipline and sound decision-making. Operated secure communications systems in accordance with Defence security requirements and planned field activities involving risk assessment, situational awareness and effective decision-making.

Deployment Engineer | DXC, Defence Protected Network Rollout

February 2017 – December 2017

Supported the nationwide rollout of the Defence Protected Network, delivering secure endpoint deployments and infrastructure upgrades across Defence sites throughout New South Wales.

Looking Ahead | The Future

Now - Forever

Technology is one of those fields where there's always something new to learn, and that's exactly what keeps me interested. I have an insatiable curiosity and tech is a space that allows me to feed that hunger for knowledge.

I'm looking forward to building more things, exploring new ideas, contributing back through open source, and finding a place where I can grow alongside a great team. Along the way, I'd also like to spend more time mentoring junior engineers and helping others find their footing in the industry.
